Python Essentials 1 Badge

Python Essentials 2 Certificate

Sana Nasir

MSc | AI Engineer in Training | Data science | Autonomous AI Systems & Document Intelligence Specialist | Agentic AI | Generative AI

Karachi Division, Sindh, Pakistan

Summary

AI & Data Science | Python Developer | Building Intelligent Solutions
| AI Engineer | Generative AI | Agentic AI

Passionate about leveraging data and artificial intelligence to solve real-world problems. With hands-on experience in developing AI applications and analyzing data to extract meaningful insights. I build intelligent automation solutions that transform business operations.

Technical Expertise:

- AI/ML: Machine Learning, Deep Learning, Natural Language Processing, RAG Systems, Docker, PostgreSQL
- Programming: Python, Streamlit, FastAPI
- Data Analysis: Pandas, NumPy, Data Visualization
- AI Frameworks: Groq API, Hugging Face, LangChain, Scikit-learn, FAISS
- Data Tools: Jupyter, Matplotlib, Seaborn
- Deployment: Hugging Face Spaces, Vector Databases

Recent AI Engineering Projects:

- AI Document Intelligence Platform - Built end-to-end RAG system with semantic search, processing PDFs/DOCX/TXT with Groq API and FAISS vector database
- Autonomous AI Workflow Orchestrator - Achieved 65% efficiency improvements and \$98,000+ annual savings through AI automation
- Full-stack AI Chat Assistant with real-time NLP using Streamlit and Hugging Face models
- Complete data processing pipelines with interactive dashboards and visualizations

Currently Building:

- Advanced RAG systems with multi-modal document processing
- Production-grade AI applications with cloud deployment

- Agentic AI systems for enterprise automation
- Scalable machine learning pipelines

I'm actively developing production-ready AI systems and excited about opportunities where I can architect intelligent solutions that drive real business impact.

Open to roles in: AI Engineering, Machine Learning Engineering, Data Science, Generative AI, Agentic AI Systems, ML Operations

Experience

Freelance

AI Developer - Personal Projects

October 2025 - Present (3 months)

- Developed and deployed a full-stack AI Chat Assistant application using Python and Streamlit
- Integrated Groq API with Hugging Face models for high-performance AI inference
- Implemented LangChain for efficient AI workflow orchestration
- Built responsive web interface with real-time chat capabilities
- Managed API integration, error handling, and user experience design

Technologies: Python, Streamlit, Groq API, Hugging Face, LangChain, REST APIs

Freelance

AI Engineer & Full Stack Developer

October 2023 - Present (2 years 3 months)

Engineered an enterprise AI automation platform that delivers 65% efficiency gains and \$98,000+ annual savings through intelligent workflow orchestration.

- Built full-stack AI solution reducing manual workflow time by 98% (2 days → 5 minutes) and business reporting by 87% (6 hours → 1 hour)
- Developed real-time analytics dashboard providing C-level executives with data-driven insights and ROI optimization recommendations
- Architected scalable system serving 500+ daily users with 99.8% uptime and sub-second AI inference via Groq API

- Implemented multi-channel automation for enterprise campaigns, project management, and business intelligence reporting
- Technologies: Python, Streamlit, Groq API, LangChain, Pandas, REST APIs, Cloud Deployment

Education

SMIT

AI and DATA SCIENCE · (May 2025 - December 2025)

University of Karachi

Masters in physiology , pathophysiology · (January 2004 - December 2007)
